TIPS FOR DESIGNING BUTTONS

The image area is a guideline for the front of your button. This is how much of your art will be visible.

The Total Area is a guideline of where your paper will be cut.

For best results, your image should fill the Total Area, with the most important elements appearing within the Image Area.

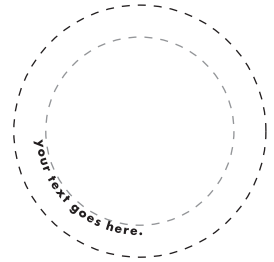

Badbuttons will add your URL or message to the edge of your button for no additional charge! This is a subtle, effective way of making sure your friends and customers remember how to find you.
